Forecast for Friday 31 May 2024

Weather: Clear intervals through the early hours leading to a reasonably bright start to the morning. Sunny spells alternating with cloudier periods during the day and whilst most likely remaining dry, there's a small chance of a light shower.

Chance of cloud-free hill tops above 600m: 70% becoming >95%.

Low cloud and visibility: Patches of cloud above 650m at first, clearing to leave all summits cloud free. Very good visibility in general with distant hills and landmarks clear to see. Locally poor in any cloud first thing.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

High UV levels through the middle of the day during the sunny spells so sun protection is advisable.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Saturday 01 Jun 2024

Weather: A fine first day of June with lengthy sunny periods and patchy cloud. Possibly turning cloudier at times in the afternoon but sunny spells remain likely. Feeling a bit warmer despite staying quite breezy.

Maximum wind: Northerly 15 mph gusting 25 mph.

Chance of cloud-free hill tops 600m: 70% soon becoming 100%.

Low cloud and visibility: A few scraps of cloud around 600m are possible on north facing slopes just after dawn, but otherwise any cloud will be above the summits. Very good visibility with excellent air clarity.

Temperature: **Valleys:** Plus 5 Celsius rising to plus 20 Celsius.
At 600m: Plus 8 Celsius rising to plus 15 Celsius.
Freezing level: Well above the summits.
